## PROFILE

Motivated Computer Science undergraduate at SLIIT with a strong foundation in full-stack development, cloud deployment, and software engineering principles. Demonstrates the ability to design and deliver end-to-end web applications from intuitive React frontends to scalable Java Spring Boot and .NET backends — backed by real-world production deployments on Microsoft Azure. Possesses a sharp problem-solving mindset, a deep commitment to clean architecture, and a relentless drive to grow beyond boundaries. Determined to earn a place at a prestigious, innovation-led organization where talent is challenged and excellence is the standard — and to leave a mark through software that is not just functional, but exceptional.

## EDUCATION

**B.Sc (Hons) in Computer Science**

Sri Lanka Institute of Information Technology (SLIIT)

October 2023 – Present

Colombo, Sri Lanka

## SKILLS

**Frontend:** React.js, Vite, HTML, CSS, JavaScript

**Backend:** Java Spring Boot, .NET (ASP.NET Core), Spring Security, REST APIs

**Languages:** Java, C#, Python, JavaScript, C

**Databases:** MySQL, SQL Server, MongoDB

**DevOps & Cloud:** Docker, Docker Hub, Microsoft Azure, GitHub Actions, CI/CD Pipelines

**Tools & Platforms:** Git, GitHub, Jira, Postman, Maven, VS Code

**Concepts:** OOP, SOLID Principles, RESTful APIs, Agile/Scrum, Database Migration

**Soft Skills:** Communication, Presentation, Adaptive Continuous Learning, Teamwork, Problem Solving

## PROJECTS

**LifeMentor – AI-Based Wellbeing & Guidance Platform (Individual)**

Feb 2026

Independently architected and engineered a full-stack AI-powered wellbeing platform featuring a Gemini-powered chatbot, daily check-in tracking, goal management, lifestyle assessments, and scheduled email reminders. Applied JWT-based authentication with BCrypt password hashing, account lock protection on failed logins, and a complete forgot/reset password flow secured with expiring tokens. Technologies used: Java Spring Boot, React + Vite, MySQL, Gemini API, GitHub Pages.

**Palm Beach Resort – Hotel Management System (Group)**

Aug 2025

Constructed a full-stack hotel management system supporting customer room browsing, booking management, in-room food ordering with real-time order tracking, and an admin dashboard with revenue and occupancy reporting. Enforced role-based access control for Admin, Customer, and Staff modules via RESTful APIs using Spring Security with JWT authentication. Containerized and deployed to Microsoft Azure using Docker, collaborating in an Agile/Scrum team via Jira. Technologies used: Java, Spring Boot, React + Vite, MySQL, Docker, Azure, Jira.

**Pathfinder – Smart Internship Management System (Group)**

2026 – Present

Expanded a cloud-based internship matching platform with separate dashboards for students, companies, and administrators – supporting job posting, applicant tracking, application status management, and real-time analytics. Executed a full CI/CD pipeline using GitHub Actions, automatically building, testing, pushing Docker images to Docker Hub, and deploying to Microsoft Azure on every merge to main. Technologies used: .NET 8, ASP.NET Core, React + Vite, Azure SQL, Docker, GitHub Actions, Vercel.
